Splashtubs the Best

We have spent over 18 years, now, striving to improve the softspa experience. When working with other former Softub tm dealers developing the Comfort Spas tm, we continued improving the design to assure less problems for softspa owners.

Splash Pools bought N E Comfort Spas and immediately improved the quality of materials and integrated new technology into the design. Adding the in line heater and 2 speed motor increased heating speed without increasing heating cost.

The desire for a deeper, smaller softspa – Splash improved on the T-140 & T-220 Softubs tm and Nevis Comfort Spa tm by developing the ST-230 Splashtub tm.

This added more volume and comfort to a smaller footprint softspa - with the 27" depth of the larger T-300 Softub tm, Comfort Spas tm, and the ST-315 Splashtub tm.

We then found ourselves taking in larger softspas as trade-ins for the ST-230 as customers commented rarely having more than one or two in their spa. The ST-315 is still popular in the ski areas, etc. throughout Colorado and the U.S.

As Splash became concerned with our nationwide sales conflicting with their desire for local dealers, they cancelled our dealership contract. Noticing the lack of sales result, they have since renegotiated our contract, again allowing us to distribute the best softspas, nationwide. However, when we quit selling their spas, sales of their ST-230 fell dramatically, causing Splash to believe they should dis-continue smaller spas and build a lower cost large softspa. We believe their attitude will change as we again sell more ST-230s to our more educated customers.

The Smartub tm design has been a real popular , quality, alternative to the 'cheap' look-alike spas. The sloped back rest and slightly raised seating has pleased many. Their 180 gal capacity is nicely sized for 1 or 2 and they have proven to be very efficient, durable and dependable.

So, we have accumulated many trade-in Comfort Spas tm and some Softubs tm. We recondition them , as needed, and resell them, reasonably, from \$1,000. + delivery.

Softspa and Essentials Specials

Smartubs are now just \$1495. + delivery, the ST-230 Splashtub (\$3295. list) just \$2195.+delivery and the ST-315 Splashtub (\$4295. list) is \$3295. +delivery. Stock up on Essentials at 15% off with FREE delivery on orders over \$50. before July 15, 2007.
