## Softspa Owners are More Sensible

In over 20 years, we have found most of our customers to be former acrylic spa owners that recognize the benefits of hot water therapy, but are tired of the hassles of owning a 'hard' spa. Our early Softspa rentals in the ski areas convinced many acrylic spa owners of the superior **comfort** of our Softspas and started our nationwide shipping. Softspas' marine vinyl exterior and tri-ply vinyl interior have proven their superior **durability** over the many years of extreme weather here in the mountains and elsewhere throughout the country.

The **efficiency** of our Softspas is still unsurpassed in the spa industry. Cooling the motor with a heat exchanger not only heats the water **economically**, it extends the life of the motor. Without the traditional 'heater' much less energy is needed, allowing our Softspas to be placed anywhere a standard 110 volt outlet is available, as their lightweight **portability** allows one person to change the location indoors or out.

The elimination of the problem causing components makes our Softspas much more **dependable** with so much less to go wrong. Simple, weekly, water maintenance and timely pump seal replacement is all that is needed for the hot and ready comfort of your Softspa.

The few parts that make up our Softspas are all designed to be easily removed and replaced by you, the owner – saving you any costly house-call charges. All this **reliability** makes our Softspas the most sensible choice in hot water therapy.

## Softspa and Essentials Specials

Should you decide you would prefer a different Softspa, you can save big with one of our reconditioned trade-ins, **from \$995**. Big savings are also available on our new Splashtubs with an **st-230 for \$2195**. or an **st-315 for \$2895**. while we pay **half the shipping cost**.
